SUMMARY

Backend Software Engineer specializing in Go with hands-on experience designing, developing, and maintaining scalable backend systems, REST APIs, microservices, and production-grade distributed services. Proficient in PostgreSQL, Redis, Docker, and Linux with strong fundamentals in system design, concurrency, performance optimization, and debugging. Passionate about writing clean, efficient, and maintainable code with a focus on reliability and scalability.

TECHNICAL SKILLS

Programming:	Go, JavaScript, TypeScript, Java, SQL, Bash
Backend:	Go (Gin, Chi), Node.js, Express.js, REST APIs, Web Services, JWT, WebSockets
Frontend:	React.js, TypeScript, HTML, CSS, Tailwind CSS
Database:	PostgreSQL, Redis, MongoDB, SQLite
DevOps & Tools:	Docker, Git, GitHub Actions, Linux, AWS
Concepts:	Concurrency, Goroutines, Channels, Microservices, Distributed Systems, Scalability, Performance Optimization, System Design, Authentication, Clean Code
CS Fundamentals:	Data Structures, Algorithms, OOP, Operating Systems, DBMS, Computer Networks

PROJECTS

ClearRouter – Scalable Backend Gateway

 Live |  GitHub

Go, Gin, PostgreSQL, Redis, Docker, GitHub Actions, React.js, TypeScript

- Designed and developed scalable backend services in Go using Gin, building a modular gateway with REST APIs integrating multiple LLM providers (OpenAI, Anthropic, Gemini, DeepSeek, Mistral).
- Implemented JWT authentication, credit-based usage system, API key management, and Razorpay webhook processing with clean, maintainable, and well-documented Go code.
- Architected PostgreSQL schema for users, transactions, and API usage analytics; optimized queries for performance and scalability under concurrent load.
- Containerized backend services using Docker Compose with separate dev and production configurations; automated testing, builds, and deployment via GitHub Actions CI/CD.

ChatHub – Real-Time Distributed Messaging Backend

 Live |  GitHub

Go, Chi, PostgreSQL, WebSocket, WebRTC, Docker, GitHub Actions

- Built scalable real-time backend services in Go using Chi and WebSockets, supporting high-concurrency direct and group messaging with PostgreSQL persistence.
- Designed concurrent connection management using goroutines and channels with Gorilla WebSocket for efficient message routing and memory optimization.
- Integrated WebRTC for peer-to-peer voice and video calls and Cloudflare R2 for secure in-chat file sharing; implemented JWT-based auth with webhook-driven user sync.
- Deployed via Docker with GitHub Actions CI/CD, ensuring reliable, scalable, and optimized backend service delivery.

FileVault – Secure Cloud Storage Backend

 Live |  GitHub

Node.js, Express.js, PostgreSQL, Cloudflare R2, React.js

- Developed secure backend services with Node.js and Express.js, implementing REST APIs for file storage integrated with Cloudflare R2 (S3-compatible) object storage.
- Designed PostgreSQL schema for users, files, audit logs, and permissions; implemented Bcrypt-hashed JWT authentication and role-based access control.
- Built expiry-based shareable links, anonymous uploads, rate limiting, and Helmet.js security headers for production-grade reliability and data protection.
- Optimized file upload/download flows using presigned URLs with edge CDN integration for improved performance and scalability.

EDUCATION

2022 – 2026	Bachelor of Technology (CSE) , UIT Barkatullah University, Bhopal	(GPA: 7.46 / 10)
2021 – 2022	Class 12th, Govt. Excellence HSS, Pandhurna	(71%)
2019 – 2020	Class 10th, Govt. Excellence HSS, Pandhurna	(85%)

EXTRACURRICULAR & CERTIFICATIONS

- Built and deployed multiple backend systems using Go with REST APIs, Docker, PostgreSQL, authentication, and scalable service architecture.

- Active Linux user with hands-on experience in Docker containerization, self-hosting, GitHub Actions automation, and backend deployment.
- Solved 90+ Data Structures and Algorithms problems on [LeetCode](#), demonstrating strong problem-solving and analytical skills.
- Postman API Fundamentals Student Expert.
